## Local Data for Better Health

The CDC Foundation and the Robert Wood Johnson Foundation have marshaled the power of local data across the 500 largest cities in America to help tackle chronic disease. A website, launched in the summer of 2017, makes available small area health data that will allow community leaders, researchers,

policymakers and others to better understand trends in disease patterns and factors at both the individual and community level that might influence these trends. Data at the city and neighborhood

level will inform local policy-makers' efforts to improve the health and wellbeing of community residents. The public interactive website will allow also users to be informed and engaged with these local efforts to impact public health city by city.

## ENGAGEMENT

## Workforce Health and Performance — Bright Ideas Survey

Take the survey here: <https://www.surveymonkey.com/r/TWLW87T>

The Center for Workforce Health and Performance wants your Bright Ideas. We will feature these ideas, select guest bloggers, delve deeply on topics and inform research and practice by spreading these Bright Ideas.

For our first Bright Ideas survey we would like to know your thoughts on the best ways to support workforce health and performance.

Our challenge — can you do it in 20 words or less?

---

**The Center for Workforce Health and Performance (CWHP)** is a clearinghouse for information that may be used to support evidence-based policies and practices for a healthier, happier and high-performing workforce, a healthier economy and, in turn, healthier and more productive communities. CWHP develops knowledge around workforce health and performance improvement and disseminates it widely through scientific and educational forums.
