## Complex Cases and Genomic Testing

This study will allow the research team to identify opportunities and barriers for health improvement, care coordination and cost reduction associated with genomic testing specific to the cases and settings included in this study.

Article by Dr. Kimberly Jinnett

CWHP will study the outcomes of employee populations after medical genomics are facilitated, case managed, and applied in high-risk, highly complex plan members. As the [inaugural study](#) in CWHP's series Complex Case Management and New Technology, this study focuses on the real world implications of genomic testing for patients, providers, employers and others around managing complex cases and the outcomes of these cases. In addition to understanding the perspectives of patients and providers, this study will assess the clinical and cost-related outcomes associated with medical genomics in employee populations through administrative data records.

## ENGAGEMENT

## Workforce Health and Performance — Bright Ideas Survey

Take the survey here: <https://www.surveymonkey.com/r/TWLW87T>

The Center for Workforce Health and Performance wants your Bright Ideas. We will feature these ideas, select guest bloggers, delve deeply on topics and inform research and practice by spreading these Bright Ideas.

For our first Bright Ideas survey we would like to know your thoughts on the best ways to support workforce health and performance.

Our challenge — can you do it in 20 words or less?

---

**The Center for Workforce Health and Performance (CWHP)** is a clearinghouse for information that may be used to support evidence-based policies and practices for a healthier, happier and high-performing workforce, a healthier economy and, in turn, healthier and more productive communities. CWHP develops knowledge around workforce health and performance improvement and disseminates it widely through scientific and educational forums.
