Job Structure and Work Climate Affect Hypertension

Dr. Rehkopf commented last year during a Twitterchat around work stress “We study the structure of the job not if someone said they were stressed. The objective structure of the job is the stressor” #WorkEnvChat

The full article and [link to Feb 2017 issue is well worth a read](#)

Workplace climate, psychosocial stressors and physical hazards all contribute to worker health, specifically hypertension, according to David Rehkopf, Stanford physician researcher and lead author of this key paper from the special issue of Health Affairs on Work and Health, February 2017.

Workforce Health and Performance — Bright Ideas Survey

Take the survey here: <https://www.surveymonkey.com/r/TWLW87T>

The Center for Workforce Health and Performance wants your Bright Ideas. We will feature these ideas, select guest bloggers, delve deeply on topics and inform research and practice by spreading these Bright Ideas.

For our first Bright Ideas survey we would like to know your thoughts on the best ways to support workforce health and performance.

Our challenge — can you do it in 20 words or less?

The Center for Workforce Health and Performance (CWHP) is a clearinghouse for information that may be used to support evidence-based policies and practices for a healthier, happier and high-performing workforce, a healthier economy and, in turn, healthier and more productive communities. CWHP develops knowledge around workforce health and performance improvement and disseminates it widely through scientific and educational forums.
